I. Greetings from the Chair

As we eagerly await arrival of spring, we will continue to see many additional changes coming to both Wayne State University and University Physician Group as we weather this storm. I thank you all for your commitment, especially through these trying times.

II. News from the Faculty

- **Vaibhav Diwadkar, PhD**, has been promoted to the rank of Professor (Research Educator) from the 2015/2016 promotion and tenure cycle. Dr. Diwadkar has been duly acknowledged in multiple awards, highlighting his high value to our institution.

- **Mary Morreale, MD**, received funding from Karmanos Cancer Institute for her Pilot Application entitled “Preferences for notification of imaging results among patients with metastatic cancer.” Dr. Morreale will be focusing on better understanding of the psychological distress surrounding CT/MRI examinations in patients with metastatic gastrointestinal and lung cancer, and patient preferences for receiving the results of these imaging studies.
III. Research Activities

- **Hilary Marusak** presented her public dissertation defense for Translational Neuroscience Program on Monday, March 14th at 10:00am. Her thesis title: Childhood Trauma and Emotion Processing Neurocircuity, where Hilary examines the influence of environmental stress and trauma on brain and behavioral development of children/young adolescents.

- **Denise Briggs**, presented her public dissertation defense for Translational Neuroscience Program on Friday, March 18th at 10:00am. Her thesis title: Cognitive, Psychiatric, and Neuropathological Manifestations of Repetitive Mild Traumatic Brain Injury.

- **Eric Woodcock**, TNP student, received a NIH F31 Predoctoral Fellowship award for his application titled, “Neuropharmacological investigation of frontostriatal network function and nicotine seeking behavior in current smokers”. Eric will investigate the effects of two pharmacological agents that will mimic the neurochemical and physiological changes that occur during a natural stress response and then measuring changes in brain chemistry, neural activation, and cigarette smoking behavior. The importance and relevance of this study is profound, as tobacco use remains the leading cause of preventable death in the United States, and exerts tremendous societal, medical, and economic burdens. Eric joined the TNP program in 2014 under the direct mentorship of Dr. Mark Greenwald, Director of the Substance Abuse Research Division at WSU and the mentoring team, Co-directors, Drs. Jeff Stanley and Vaibhav Diwadkar, of the Brain Imaging Research division and Boris Baltes, in the Department of Psychology.

- Congratulations to **Natalie Wiseman**, TNP student, who has been elect as a Trainee Representative by the International Society of Magnetic Resonance in Medicine (ISMRM), and the Psychiatric MR Study Group. Ms. Wisemen will begin during the upcoming 2016 ISMRM Annual Meeting & Exhibition in Singapore. This is a two (2) year post and will end in 2018.

Department of Psychiatry and Behavioral Neurosciences Translational Neuroscience Program Symposium and Research Day will be held at the Margherio Family Conference Center and room 1328 Scott Hall on Friday, April 22nd. Please see pages 4 -5 for additional details.

IV. Office of Education and Training

- Congratulations to **Rami Abukamil, MD** a PGY-3 resident, on receiving the Margolis Travel Fellowship award. The Margolis Travel Scholarship is aimed to encourage trainees to pursue forensic psychiatry training in the hopes that they will one day establish careers in the Midwest, become productive members of the organization, and contribute meaningfully to this field. This stipend will assist Dr. Abukamil in attending the annual meeting of the Midwest Chapter of the American Academy of Psychiatry and the Law (MWAAPL) on April 1-2, 2016 in Chicago, IL.

- Congratulations to **Arthur Robin** and the Psychology Internship program, as they received their match results. Please welcome to the Child Psychology program:
  - Jamie Arthurs- Indiana University, Pennsylvania
  - Alaina Conner- University of Georgia
  - Maria Jay- Georgia Professional School of Psychology
  - Heather Kertesz- California School of Professional Psychology- Alliant University, LA.

- Congratulations to **Kamalika Roy, M.D.**, PGY-4 resident, who recently had her article, “Role of Psychiatrist in Assisted Dying: A changing trend” published in the American Journal of Psychiatry Resident Journal. Dr. Roy will be graduating from our program and starting Psychosomatic medicine fellowship at the University of Michigan.

- Congratulations to **Richard Balon, MD** who received continued accreditation with COMMENDATIONS and NO CITATIONS from the ACGME.
Residents Summer 2016 Seminar Schedule. This is mandatory for all the residents, but faculty and staff are invited to attend.

All sessions will be held from 1:00 pm – 2:00 pm in the 2nd floor conference room on the dates below.

Save the Date for this year’s Psychiatry Residency graduation to be held on Friday June 3, 2016 at the Detroit Yacht Club.

"A day without laughter is a day wasted." - Charlie Chaplin
Department of Psychiatry
and Behavioral Neurosciences

Translational Neuroscience Program Symposium and Research Day

April 22nd, 2016

TIME:
8:30 am - 2:30 pm

LOCATION:
Margherio Family Conference Center and Conference Room 1328
Gordon H. Scott Hall of Basic Medical Sciences
Program

8:30am - 9:00am  REGISTRATION
Margherio Family Conference Center

9:00am - 9:10am  OPENING REMARKS
Dr. David R. Rosenberg, M.D.
Chair of Psychiatry & Behavioral Neurosciences
WSU School of Medicine

ORAL PRESENTATIONS OF TRAINEES

9:15am  Kathleen J. Maheras and A. Gow
The Consequence of Dysfunctional Myelin on Neural Processing

9:30am  Nilufer Esen and P. Dore-Duffy
Adaptation to Mild Hypoxia Affects Both Onset and Severity of
Experimental Allergic Encephalomyelitis

9:45am  Kelly E. Bosse, C. Sinai, J. Brandenburg and A.C. Conti
Reduced Voluntary Ethanol Intake and Preference Following Genetic
Deletion or Pharmacologic Inhibition of Adenylyl Cyclase 1

10:00am  Hilary A. Marusak, C. G. Zundel and M. E. Thomason
Is Neutral Really Neutral?

10:15am  Brian H. Silverstein, K. Ramaseshan, A. Burgess, D.
Khatib, U. Rajan, J. A, Stanley and V. A. Diwadkar
Characterizing Dynamic Modulation of the Functional Dysconnectome in
Schizophrenia

10:30am  Eric A. Woodcock, D. Khatib, M. K. Greenwald, V. A.
Diwadkar and J. A. Stanley
Glutamate Modulation During Working Memory:  A Pilot Functional
Proton Magnetic Resonance Spectroscopy Study

10:45am - 11:00am  COFFEE BREAK

POSTER VIEWING SESSION

11:00am - 1:00pm  POSTER VIEWING SESSION
Conferece Room 1328
Gordon H. Scott Hall of Basic Medical Sciences

12:00pm - 1:00pm  LUNCH
Conference Room 1328
Gordon H. Scott Hall of Basic Medical Sciences

STUDENT KEYNOTE PRESENTATION

1:00pm - 1:25am  Wafaa Sweidan
Translational Neuroscience Program
Deep Brain Stimulation: The Switch to Reverse Disorders of
Movement, Mood and Cognition

KEYNOTE PRESENTATION

1:25pm - 2:15pm  Stephan F. Taylor, M.D.
Professor of Psychiatry
Dept. of Psychiatry, University of Michigan, Ann Arbor, Michigan
Brain Stimulation: New Advances in the Neurocircuitry of Depression

2:15pm - 2:30pm  AWARDS CEREMONY AND CLOSING REMARKS
Margherio Family Conference Center
